

Technical Laser Ranging Workshop Matera 2015

Space Debris Session Summary

Georg Kirchner

- Amount of Space Debris is increasing - Laser Ranging to Debris too ...
- Institutions (ESA, EU Commission etc.): Growing interest and support ...
- Several SLR stations have started with SD ranging activities
- New techniques tested now (Nanowires etc.)
- Campaigns started for SD Attitude Motions Measuring
 - Light Curve measurements added
- We have learned some new words and definitions:
 - **DART** - **D**efinitely **A**Ranging **T**oy 😊
 - **'MORAL'** is less worth than a Ferrari 😊
